Print Manager Plus® 9.0: The next generation in print management

Print Manager Plus® 9.0 redefines print management by giving businesses unprecedented control, access and insight into their printing. Perfected over decades of use in organizations around the world, the cutting-edge software solution represents the very best in support and technology aimed at reducing costs, cutting waste and providing greater printing intelligence.

Key Features

1-3%
Percentage of gross annual revenue spent on printing resources by enterprise companies worldwide

An immediate decrease in printing materials and energy is afforded by the use of Print Manager Plus® 9.0

An immediate cost savings results from the use of Print Manager Plus® 9.0

- **Live Auditing**: IT departments can instantly access up-to-the-minute printing information defined by printer, network or cost.

- **Quota and Budget Tracking**: For organizations with hard cost limits, quotas and budgets restrict user groups and organizational units.

- **Restrictions and Rule Setting**: Organizations gain greater control over cost and security with restrictions and rules set on printers or users.

- **Web-based Reporting and Scheduling**: A web-based interface enables the precise and easy planning and execution of budget needs and flow data.

- **Release Station with Payment Options**: Printing jobs held for release by rules or restrictions are facilitated through a transparent and accessible web portal.

- **Mobile Printing via Cloud**: Users can print from anywhere with a web-based interface that enables network access.

- **Client and Project Billing**: A software-based system enables billing against clients, accounts and codes from workstations or the mobile web portal.

- **Environmental Impact Reporting**: Energy and material waste from printing is tracked in real time, giving organizations greater insight into their green credentials.
9.0 Benefits

The Best Technology
The original Print Manager Plus® software was developed in 1994 as the first of its kind native to the Windows operating system. Still the only technology with this claim, Print Manager Plus® 9.0 takes its leading technology to the next level by enabling printing to be more than just a managed cost. It helps companies to leverage print management to the benefit of business through greater transparency, control, compliance and intelligence.

Next-generation accessibility
Print Manager Plus® 9.0 reflects years of carefully collected customer input, a deep understanding of changing business needs, and a focus on the future of technology. The software provides next-generation accessibility, mobility, and technical quality with web-based printing and cloud integration: Quite simply, it’s a modern technology for the modern worker.

Enhanced Ease of Use
From the start, Print Manager has been celebrated by its users as accessible and seamlessly supported. Those same qualities continue to drive the development of the Print Manager Plus® software today. Print Manager Plus® 9.0 is easier to use and better supported than ever, from installation and integration through scalability and reporting.

Increased Cost Saving Potential
For decades, customers have been experiencing immediate ROI with the Print Manager software. Print Manager Plus® 9.0 takes cost savings to the next level by enabling companies to take control of a critical cost generator and put savings back into the IT budget.

Robust Environmental Reporting
Print Manager is—and always has been—an inherently green technology. The software immediately eliminates wasted printing materials and energy, helping companies to hit green targets and garner both the cost and reputational benefits of reducing waste. Print Manager Plus® 9.0 provides the additional benefit of easy and robust environmental reporting.

Benefits in Brief

Immediately cuts printing costs
Immediately reduces printing waste
Reduces total cost of IT infrastructure
Saves IT staff and user time
Supports organizations’ compliance with regulations like HIPAA, Sarbanes-Oxley and Data Protection Act intelligence.
