Whether your an Academic, Corporate, Government, or Professional Services organization using the Reports Center Option can be used to make better decisions regarding printing. With the precise enterprise printing traffic in detail at your fingertips learn and teach how to save, budget, and use all of your printing resources.

Monitor all printing with over 100 detailed premade Reports, Statements, and Graphs that allow you to see who is printing, what they are printing, and the cost of that printing. Bill back department budgets or just examine overall print traffic and budgets. Irresponsible printing puts a strain on your organization's budget and Print Manager Plus can eliminate wasted printing by up to 50% or more on a single network.

This add-on option for Print Manager Plus allows you to share network-printing data with your entire enterprise. With web-based reports and built in viewing rights and permissions that hook into Active Directory you can plan and execute your budget needs and flow data with ease and precision. Set it all to automatic with a built in scheduler that will build reports, send reports and graphs via email or saved to a share on the server. If you don't like our pre-made reports, statements, and graphs, then edit them or create your own with the Business Intelligence Development Studio. (Ad-Hoc Reporting)

Whether your an Academic, Corporate, Government, or Professional Services organization using Print Manager Plus with this Reports Center Option can be used to

make better decisions regarding printing. With the precise enterprise printing traffic in detail at your fingertips learn and teach how to save, budget, and use all of your printing resources.

The product is licensed as a Standard and Professional version. Besides the existing current built-in reports already included within Print Manager Plus, this add-on option and many additional features highlight the precise, and important data collected.

For a fast and easy implementation we will walk you through the setup, call now for a quick consultation with one of our experts.

At Print Manager, we believe in great technology. We believe great technology can and should delight people. And we believe in going the extra mile for our users and making the perfect product. We hate waste and the negative effects on our environment, which comes from a printer industry geared to sell you more paper, more ink and more printers. They are not incented to give you control over this waste, but we are. We believe that great technology can put IT in control of waste and let you get on with your job.
